MANAGEMENT INSIGHT

YANG PERLU DIPERHATIKAN

Registration dan KYC melemah

Registration/day turun 12.7% dan KYC/day turun 32.5% dibanding 1-9 Agustus. Funnel acquisition ke verified perlu diperkuat.

Google Ads lebih efisien

CTR naik ke 10,40%, conversion rate naik ke 9,60%, dan CPC turun 11,81% dibanding previous 7-day period, meskipun clicks dan conversions menurun.

Revenue shipment sangat rendah

Hanya Rp73,5 ribu total ongkir dan 7 delivered orders pada dashboard. Pastikan apakah delivery masih belum matang atau benar-benar terjadi penurunan operasional.

Attribution perlu divalidasi lintas GA4 & member

GA4 memiliki 24.463 Unassigned sessions dan 11.090 new users berlabel Unassigned. Pada member export juga ditemukan nilai UTM "16". Keduanya perlu dikonfirmasi sebagai internal mapping, measurement gap, atau attribution issue sebelum digunakan untuk keputusan channel.

YouTube melonjak karena satu konten

2.293 dari 2.718 views berasal dari Tarkam recap (~84%). Shorts mendorong discovery, tetapi average view duration turun ke 26 detik.

TikTok audience mismatch

57,4% followers tercatat dari Vietnam dan hanya 10,5% Indonesia. Untuk brand logistik Indonesia, distribusi audience ini perlu diaudit.

Mobile acquisition turun ringan

Google Play new users/day turun 14.7%; iOS first-time/day turun 4.5% dibanding cutoff sebelumnya.

Firebase order intent cukup bertahan

Order-start users/day justru naik 8.8% dan saved users/day naik 14.5%, walaupun first_open users/day turun.

GA4 naik, tetapi kualitas traffic perlu diaudit

Total users naik 25,90% dan new users naik 36,94%, namun sessions/user turun 18.11% dan bounce rate naik. Singapore juga menyumbang 60,3% users dengan engagement hanya 10,15%.
